E26 Bulb Indoor Luminaires
Ceiling Mount – Pendant
120VAC / 60Hz

Model #: BRXPxxMBxxGD

Safety Precautions

- Read all safety precautions and installation instructions carefully before installing or servicing this fixture. Failure to comply with these instructions could result in potentially fatal electric shock and/or property damage.
- It is recommended that a qualified electrician perform all the wiring. This fixture must be wired in accordance with all national and local electrical codes.
- Do not handle any energized fixture or attempt to energize any fixture with wet hands or while standing on a wet or damp surface or in water.
- This fixture is designed for use in a 120VAC / 60Hz circuit.
- Make sure that the power source conforms to the requirements of the fixture. (See labels on the fixture housing).
- To reduce the risk of electrical shock, and to assure proper operation, this fixture must be adequately grounded. To accomplish proper grounding, there must be a separate ground wire (green) contact between this fixture and the ground connection of your main power supply panel.
- This fixture is intended to be used for general indoor lighting in dry or damp locations.

Assembly Instructions

Step 1 – Preparing for installation

A. **Disconnect electrical power** at the fuse or circuit breaker box before installing or servicing any part of this fixture.
B. Carefully remove the fixture and hardware kit from the carton.
C. Remove components from the hardware kit.
D. Remove the mounting bracket (1) from the fixture (3) by removing two screws (4).
E. Install the mounting bracket (1) to the 3-0 or 4-0 junction box (not included) using two screws (2) to secure it.
F. The fixture is provided with 144" adjustable cord (6). To raise fixture metal shade (7) from the floor to desire height by releasing the cable-locking screw on the side of strain relief connector (5) part of the fixture (3). Carefully push excess cord inside the canopy until desired length is achieved. Re-tighten cable-locking screw to secure it. Dress excess cord neatly behind the fixture.

Wiring – All wiring must take place inside the junction box (not included)

Caution: Make sure power is off at the fuse or circuit breaker box. Check power wires for damage or scrapes. Use wire suitable for at least 90°C (194°F).
Note: Most dwellings built before 1985 have supply wire rated to 60°C. Consult a qualified electrician to ensure correct branch circuit conductor before installing.

Step 2 – Wiring fixture

A. Make all wire connections to appropriate wire. Secure with wire nuts (provided).
B. Connect the green wire from the fixture to the supply source ground wire.
C. Connect the black wire from the fixture to the black (L) wire from the supply power source.
D. Connect the white wire from the fixture to the white (N) wire from the supply power source.
E. **Do not mix wires.** Pull on each wire lead to make sure connections are secure. Make certain no bare wires are exposed outside of wire connectors. Tuck all connections neatly into the junction box.

Step 3 – Mounting fixture

A. Install the fixture (3) by aligning side holes to the mounting bracket (1) using two screws (4) to secure it.

Step 4 – Adjusting fixture height

A. Adjust cord length (6) by loosening the strain relief screw (5) on the bottom of the canopy. Push the cord inside the canopy and re-tighten the screw once the fixture is at the desired height.

Step 5 – Lamping

A. Install medium base bulbs, E26 (Type A19, 60W max. – not included) into the socket and turn clockwise until snug to secure it.

Step 6 – Restore power at the fuse or circuit breaker box
