

# LED Indoor Luminaires

## Surface Mount – Motion Sensor & PIR

### 120VAC / 60Hz

Model #: TNAF06LAJENxx

## Safety Precautions

- Read all safety precautions and installation instructions carefully before installing or servicing this fixture. Failure to comply with these instructions could result in potentially fatal electric shock and/or property damage.
- It is recommended that a qualified electrician perform all wiring. This fixture must be wired in accordance with all national and local electrical codes.
- Do not handle any energized fixture or attempt to energize any fixture with wet hands or while standing on a wet or damp surface or in water.
- This fixture is designed for use in a 120VAC / 60Hz circuit. This fixture is not compatible on dimming circuit.
- Make sure that the power source conforms to the requirements of the fixture. (See labels on the fixture housing).
- To reduce the risk of electrical shock, and to assure proper operation, this fixture must be adequately grounded. To accomplish proper grounding, there must be a separate ground wire (green) contact between this fixture and the ground connection of your main power supply panel.
- This fixture is intended to be used for general indoor lighting in dry, damp, or wet locations. For wet locations, fixture must be mounted at least 48 inches above ground level.
- Disclaimer  
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules and Canadian ICES-005 (B) / NMB-005 (B). These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiver antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult with the dealer or an experienced radio/TV technician for help.

Any modifications to this fixture may void the warranty and interfere with the safe operation of the luminaire.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

## Assembly Instructions

### Step 1 – Preparing for installation

- Disconnect electrical power at the fuse or circuit breaker box before installing or servicing any part of this fixture.
- Carefully remove the fixture from the carton, remove components from hardware kit.
- Remove diffuser (5) from the fixture (1) by rotating it counterclockwise and pull away from the fixture.
- Remove mounting bracket (2) from the fixture (1) by removing two screws (4).
- Install mounting bracket (1) to the 3-0 or 4-0 junction box (not included) using two screws (3) to secure it.

### Wiring – All wiring must take place inside junction box (not included)

**Caution:** Make sure power is off at the fuse or circuit breaker box. Check power wires for damage or scrapes. If power supply wires are within three inches of the DOB, use wire suitable for at least 90°C (194°F).

**Note:** Most dwellings built before 1985 have supply wire rated to 60°C. Consult a qualified electrician to ensure correct branch circuit conductor before installing.

### Step 2 – Wiring fixture

- Make all wire connections to appropriate wire. Secure with wire nuts (provided).
- Connect the green wire from the fixture to the supply power source ground wire.
- Connect the white wire from the fixture to the white (N) wire from the supply power source.
- Connect the black wire from the fixture to the black (L) wire from the supply power source.
- Do not mix wires.** Pull on each wire lead to make sure connections are secure. Make certain no bare wires are exposed outside of wire connectors. Tuck all connections neatly into the junction box.

### Step 3 – Mounting

- Install fixture (1) to the mounting bracket (2) using two screws (4) to secure it.

### Step 4 – Color Changing Temperature Adjustment, CCT (if desired)

- Adjust CCT switch on front of fixture to the desired color temperature of 3000K, 4000K, or 5000K.

**Note:** Fixture is preset to 3000K from factory.

#### COLOR TEMPERATURE ADJUSTMENT SETTING

### Step 5 – Installing diffuser

- Install diffuser (5) by aligning 3 tabs with corresponding slots on the fixture (1) then push up toward fixture and gently rotate clockwise slightly to secure it.

### Step 6 – Restore power at the fuse or circuit breaker box

### Step 7 – Photocell and motion sensor operation (Fixture is preset to OFF for both PC and MS detection)

- PHOTOCELL:** The photocell sensor is integrated with the fixture for dusk to dawn operation. When sunlight is detected, fixture will remain off. When sunlight is not detected, fixture will turn to 100% brightness.
- MOTION SENSOR:** When motion is detected, fixture will turn to 100% brightness for 90 seconds during dusk condition. Fixture will remain Off until motion is detected only at dusk condition. Note: Detection range is 12 feet, 130 degrees.

View shown for reference only. Individual models may vary.

#### Limited Factory Warranty

AFX Inc. hereby warrants that this fixture is free from defects in materials and workmanship when installed and used under normal operating conditions for a period of 5 years from date of purchase. This warranty covers all component parts and extends only to replacement of defective fixture or components; it does not cover failure due to improper installation, misuse, mishandling or damage incurred in transit.
