

Model #: LEOPxxxxMBxxRND6

- Read all safety precautions and installation instructions carefully before installing or servicing this fixture. Failure to comply with these instructions could result in potentially fatal electric shock and/or property damage.
- It is recommended that a qualified electrician perform all the wiring. This fixture must be wired in accordance with all national and local electrical codes.
- Do not handle any energized fixture or attempt to energize any fixture with wet hands or while standing on a wet or damp surface or in water.
- This fixture is designed for use in a 120VAC / 60Hz circuit.
- Make sure that the power source conforms to the requirements of the fixture. (See labels on the fixture housing).
- To reduce the risk of electrical shock, and to assure proper operation, this fixture must be adequately grounded. To accomplish proper grounding, there must be a separate ground wire (green) contact between this fixture and the ground connection of your main power supply panel.
- This fixture is intended to be used for general indoor lighting in dry or damp locations.

- A. **Disconnect electrical power** at the fuse or circuit breaker box before installing or servicing any part of this fixture.
- B. Carefully remove the fixture and hardware kit from the carton.
- C. Remove components from the hardware kit.
- D. Remove the canopy (1) from the fixture (7) by removing two barrel nuts (8) and detach the two hanging cables (5) from the hook location at the canopy side only. Carefully place the other half of the fixture to the side.
- E. Install the canopy (1) to the 3-0 or 4-0 junction box (not included) using two screws (2) to temporarily secure it. Mark four mounting holes for additional support. Take the canopy down and drill an appropriate hole at a marked location. Install plastic anchors (3 – not included) at drilled locations and remount the canopy using two screws (2) and (4 – not included) to secure it.
- F. The fixture is provided with 108" adjustable cord (10). To raise fixture glass diffuser from the floor to desired height by releasing the cable-locking screw on the side of strain relief connector (9) part of the fixture (7). Carefully push excess cord inside the canopy until desired length is achieved. Retighten cable-locking screw to secure it. Dress excess cord neatly behind the fixture.
- G. Re-attach the other half of the fixture (7) to the canopy (1) using two hanging cables (5) to temporarily secure it. Note: may require two people for installation due to weight of the fixture.

- Make all wire connections to appropriate wire. Secure with wire nuts (provided).
- Connect the green wire from the fixture to the supply source ground wire.
- Connect the black wire from the fixture to the black (L) wire from the supply power source.
- Connect the white wire from the fixture to the white (N) wire from the supply power source.
- Do not mix wires.** Pull on each wire lead to make sure connections are secure. Make certain no bare wires are exposed outside of wire connectors. Tuck all connections neatly into the junction box.
